HELLO! I am a senior psychology student at Portland State, but had to drop my final term due to the extensive research my housing crisis demanded JULY 2025. Luna is my 3 year old cat prescribed as my ESA.

HELP! My apartment is not certified for occupancy, is a structural hazard with safety concerns, & an environmental health hazard to the public.

PSA! My neighbor developed pneumonia & her rabbit died due to mold exposure. The mold infestation of my landlocked, off-campus unit exceeds 9 ft.² inside & out, “life-threatening”, per HUD NSPIRE.

911! I am in the worst health of my life since moving here in 12/2022, with 19 symptoms of mold toxicity never before recorded in my medical history.

CRISIS! I have reported to numerous agencies on several occasions repeatedly since JULY 2025, with no intervention. I have state & federal zero income & am in a federal SSI appeal.

SERIOUSLY! Eugene Police opened Fraud case#26-05193 APRIL 2026. The City opened Compliance case#25-01591 NOV 2025. Details are in my archive: https://archive.org/details/@svc87/lists/1/1840-onyx-aly

THANKS! I'm in shut-down survival mode for the past few years & in the worst health of my life, then - my housing crisis hit. The stress escalated to an induced state of psychosis & a week long involuntary stay at the psychiatric unit brought in by police escort; I could finally breathe & think. It was the break I needed from this mess so I can continue trying to get us out of here.❤️**Sierra**

THANKS! I love my catio & going for walks. I sit in front of the door - at the crack - when it's too late to go outside; I go where good air flows. I love my towers I've had since a kitten, but they will need to be replaced due to mold spores. We have been ready & waiting to move since JULY.❤️ **Luna**
